GLOBAL HEALTHCARE DEFINITIONS

Global Healthcare often requires solutions to address unique and diverse requirements within the vast range of healthcare applications. The following definitions describe the Global healthcare product solutions available.

ADDITIONAL WEIGHT

For unique and demanding challenges in behavioral health facilities, products are weighted to reduce the ease of movement or lifting product to use as a weapon. The product selection and application identified will assist in determining the amount of additional weight required. Weighted product is designed for facilities looking to create safe and secure environments, while ensuring the furniture can withstand intensive use. To determine the amount of additional weight to be added to a product, contact your Global representative.

BED BUG RESISTANT

Due to an increase in the presence of bed bugs within healthcare facilities, solutions have been developed to deal with the bed bug issue. The product design directly affects the level of resistance that can be achieved. For more detailed information, contact your Global representative.

CONTRABAND RESISTANT

Making a product contraband resistant is a potential solution if you want upholstered and comfortable products to be finished in a manner that offers a greater level of safety. Contraband resistant finishing is added to products in high risk areas where individuals might attempt to hide contraband such as weapons (for self-harm or to cause harm to others), drugs or alcohol. It can also be part of a solution for protecting any area of the product from becoming a ligature point.
The product surfaces and upholstery will be evaluated and the appropriate solutions will be applied to ensure all surfaces are sealed and safely protected. Depending on the product design, this could mean any combination of the following applications: sealed seams, sealed underside, tamperproof fasteners and/or sealed zippers. After being evaluated, solutions are applied based on the application and population being served. The result of this process would enable the caregiver to identify a potential threat as it would be apparent that the product surface was tampered with. To further assist product selection and what is required specific to a product, please contact your Global representative.

HIGH DENSITY ULTRACELL FOAM

High density Ultracell foam is a non-allergenic foam manufactured from natural seed-based oils such as soybean. It significantly decreases the dependence on fossil fuels like petroleum and reduces greenhouse gas emissions. The high density of the foam provides comfortable sitting for many years before any sagging or indents appear underneath upholstery. Simply, there is more material available to allow for enhanced performance.

MENTAL HEALTH FURNITURE

Mental health furniture can range from simple to complex, depending on the application and population. Global understands the unique nature and the need to offer a vast range of solutions to deal with the safety of staff and patients while respecting budgets and individual needs. This allows the client to select a product from our complete offering and then build it up to ensure the right features are included. Here are some of the optional features available: tamperproof fasteners, additional weight, floor mount brackets, puncture resistant textile and other contraband resistant features that are needed for the application. Whatever the demand, the correct solution can be built-in. For more detailed information, contact your Global representative.

MOISTURE BARRIER

Moisture barrier is a textile lining with moisture repellent qualities. Moisture barrier lining is applied on the seat cushion between the upholstery cover and foam to prevent any form of moisture from getting to the foam. It is recommended when the fabric being used does not have moisture repellent qualities or when additional protection from penetration of moisture is desired. For coated textiles, the additional moisture barrier option may not be selected in conjunction with sealed seams.

MOISTURE AND TAMPER RESISTANT ZIPPER

Moisture and tamper resistant zippers are available as part of the solution when requesting bed bug resistant furniture and contraband resistant solutions. In addition, this special zipper prevents liquid and moisture seepage through the zipper teeth, providing additional peace of mind. For more detailed information based on the product selection, contact your Global representative.

SEALED UNDERSIDE

Sealed underside refers to the process of finishing the underside of a product to ensure no potential openings from the textile surface to the product interior on seat and/or back seams. The sealed underside solution is requested for achieving higher levels of infection prevention control for the product being ordered. The sealed underside option is noted in the price list notes with the upcharge for the respective product. For more detailed information and to determine if the sealed underside process is available on a particular product selection where it is not noted, contact your Global representative.

SEALED SEAMS

The heat-sealed seams process involves sealing the back of a seam with a specially designed tape. Sealing the seam increases the integrity of the seam reducing the likelihood of seams opening over time. This tape provides additional protection against moisture seepage and prevents insects from entering the product through the stitch holes and seams. The sealed seam process is available for use on most coated textiles and is not available on woven textiles. Some coated textiles do not allow sealed seams to be used. In the event sealed seams are to be used, contact Customer Care to confirm sealed seams are approved for the coated textile selected in advance of order placement. Sealed seams cannot be specified if using the moisture barrier lining. The sealing of seams requires testing the textile to ensure acceptance of the heat-sealed tape for performance and aesthetics. For detailed instructions on textile testing and approval, contact your Global representative.

TAMPERPROOF

Tamperproof fasteners can be requested for a higher level of safety. Using tamperproof fasteners ensures the fasteners cannot be interfered with (changed, opened or removed) without use of a special tool. This will prevent the tampering with, or disassembly of the product which could lead to injuries or unsuspecting harm to others. For more detailed information contact your Global representative.

STANDARD FEATURES

- The Adeline series is an ideal solution for patient or guest seating. The series includes fixed and flex back patient chairs with a choice between models with curved upper back or a straight upper back design. The straight top back design offers an upper, contoured headrest area. A low, straight back bariatric model is also available.
- The flex back moves with the user, providing comfort and support while seated.
- Sleek oval tube steel frame available in powder coat, painted finishes. See options.
- Armcaps are available in standard healthcare urethane finishes. See options.
- Seats have a seamless, waterfall front edge and include an underseat, water resistant, coated liner. Select sealed underside (**SU**) for added protection. See upcharge. Standard seat height on all models is 18"
- Seat and back are standard with high density Ultracell foam and include a clean out space.
- Sealed seat seams may be specified with approved coated textiles (vinyl, silicone, polyurethane) to mitigate liquid penetration at seams. Specify (**SE**) for sealed seat seams. See upcharge.
- Curved back models have zipper closures. Straight back models have a staple strip closure. For sealed back seams, specify (**SWZ**) Sealed Back Seams with Zipper for curved back models and (**S2**) Sealed Back Seams on straight back models. See upcharge.
- Note: minor puckering is common with the addition of sealed seams due to material buildup at corners.
- A moisture barrier is available on seats to create an impervious barrier between the upholstery cover and cushion, specify (**MB**). See upcharge. Moisture barrier is not recommended with coated textiles (vinyl, silicone, polyurethane, etc.). Moisture barrier **may not be specified** when sealed seams are selected on seats.
- Bariatric model GC7694 has a low, straight back with a 28" wide seat. An upholstered, structural side panel is included on either side of the frame. Choose a coordinating Allante FRee vinyl color to complement armcap colors, see options.
- Standard with Black, nylon glides. An optional, natural nylon, non-marking glide is available.
- Optional tamperproof fasteners (**TF**) are available. See upcharge.
- Active weight capacity is 350 lbs. for standard seating and 750 lbs. for Bariatric seating.
- Chairs may be specified with contrasting fabrics. Specify seat cushion separate from back cushion. For pricing, start with the base price and add applicable graded textile upcharges for both back and seat textile selections.
- The blended textile matrix does not apply to this series when specified as noted above. For alternate textile applications, contact Customer Care.
- The series is covered under Global's Healthcare warranty for 12 years, 24/7 use when specified with approved healthcare textiles and maintained according to warranty.
- For healthcare textiles and finish options, visit the website at globalfurnituregroup.com
- Can be upholstered in standard Global textiles if healthcare compliance is not required.
- Shipped fully assembled.

- Freestanding models are shipped fully assembled.
- Modular components: The series offers all components required to build endless runs of seats, benches and connecting tables within the parameters outlined. See Comprise Modular on page 82 for components, planning and specifying.
- Chair backs are upholstered, molded foam, available in high or medium back heights. Backs have replaceable upholstery covers with zippered bottom seams. Zippers are standard with tabs removed. A waterproof zipper is standard when sealed back seams are specified.
- Seats have a seamless, waterfall front edge, with highly durable, molded high density foam and include an underseat, water resistant, coated lining (**CL**). For added security and infection prevention, order sealed lining (**SU**), see upcharges. The sealed lining option seals the staple strip making it tamper resistant and leak proof.
- For use with approved coated textiles (vinyl, silicone, polyurethane), optional sealed seams are available to mitigate liquid penetration at seams. Specify (**SWZ**) for back sealed seams with waterproof zipper, and (**SE**) for sealed seat seams, see upcharges. *Note: minor puckering is common with the addition of sealed seams due to material buildup at corners on seats and backs to mitigate liquid penetration at seams.*
- For moisture barrier on seat, specify (**MB**). Moisture barrier is not recommended with water resistant textiles and may not be used in conjunction with sealed seams.
- Offsets and cleanout around all sides of seats simplify cleaning with easy to wipe surfaces and reduced number of materials used for simplified cleaning and infection control.
- Glass filled nylon, easy to grip loop arms and legs offered in 5 different colors.
- Painted metal rails match arm and leg finish.
- An optional matching painted metal armless rail shroud is available to cover the set of rails, visible between the seats in multi-seat, armless configurations. The shroud provides a single, cleanable surface across the rails. Specify (**ARS**), see upcharges. The armless shroud can also be field installed on existing layouts (specify modular model C4PRSN).
- Standard with color matching nylon glides (**ST**), suitable for most surfaces. Natural nylon, non-marking glides (**NM**) are also available.
- Matching wallsaver feet (**WS**) are optional on freestanding seating and benches. Upcharges vary, see model. Freestanding models receive two wallsaver feet. Please note, with wallsaver glides on chairs, there is an additional 1.3" in depth on medium back models, 0.88" on high back models. Specify color to match legs.
- Floor mount (**FM**) glides are optional in Black only. Upcharges vary, see model.
- Table tops are standard in thermally fused laminate (**TFL**). High pressure laminate (**HPL**) and Solid Surface (**CO**) are also available. Upcharges vary, see model.
- Tamperproof fasteners (**TP**) are optional on all models. Upcharges vary, see model.
- Seating models may be specified with contrasting fabrics. Specify seat cushion separate from back. For pricing, start with the base price and add grade upcharges for both seat and back selections. *Note: the blended textile matrix does not apply to this series when specified as noted above.*
- For healthcare textiles, visit the website at globalfurnituregroup.com.
- Comprise is covered under Global Healthcare 12 year, 24/7 warranty when upholstered with approved healthcare textiles.
- Can be upholstered in standard Global textiles if healthcare compliance is not required.
- Warranted to support up to 400 lbs. active weight capacity per seat for standard size seating and 600 lbs. for bariatric seating.
- Power/charging units are specified separately for field installation. See Comprise Modular on page 82. Each unit includes a tamper resistant simplex, USB-A and USB-C charging ports. Choose undermount or clamp mount for use under/on tables and table tops. Available Black (**B**) or White (**W**) with 10' long cord. Connecting tables and end tables are pre-drilled for undermount power attachment.

COMPRISE MODULAR

Two Textile Application

model C4030LA
Medium Back Bariatric Single Seat with Arms, Freestanding

For Comprise Freestanding components, see page 72

STANDARD FEATURES

- Comprise series features a refined, modern design with versatile freestanding and modular guest seating. The series achieves high durability with nylon arms and legs on a metal rail structure; engineered for rigorous healthcare and high-traffic environments, it maximizes long-term value with fully replaceable and field reconfigurable components, ensuring a significant return on investment.
- For standard features and option descriptions, see Comprise pg. 72. To see each modular component specification options, please refer to the build-it feature on the website.

Modular Components

- The series offers all components required to build endless runs of seats, benches and connecting tables within the parameters outlined.
- Modular components are shipped separately for field assembly.
- The modular design is based on rail sizes, determining number of tops (seat & back, bench seat and/or table top) that they support.

Modular Structural Components

- Rails are available in 11" modular lengths, from 22" to 66". Rails are non-handed. Each rail assembly includes two rails (front and back) and requires legs to support each end (end leg or center connecting legs). Specify finish to match legs.
- End legs, end legs with arms, center connecting legs and center connecting legs with arms are non-handed and shipped with hardware to attach the units to rails. Specify finish to match legs.
- Center connecting tables are available in either 10" or 22" widths. These kits include rails, tabletop and hardware. They connect between center connecting legs only. Specify rail finish to match legs.
- 90- and 120-degree center connecting tables are corner tables. They include rails, corner leg and corner tabletop with connecting hardware. Corner connecting tables connect between center connecting legs only. Specify rail and leg finish to match adjacent legs.
- Bariatric single seat tops and bariatric benches include rails and must mount between end or center connecting legs. Specify rail finish to match legs.

Rail-Mounted Components

- Single seats and single bench seats include attachment hardware to mount on rails (specified separately). Seats are shipped preassembled with back attached to seat.
- Center arm (C4PCA) mounts on rails between rail-mounted single seats, benches and tables. The arm is non-handed and includes hardware. Select finish to match end legs and rails.
- 10" and 22" single table tops, no rail (C4PT10R and C4PT20R) mount to rails. 10" table tops mount on either end of a 32" rail or centered on a 54" rail only. 22" table tops mount along rail in standard seat locations. Attachment hardware is included.
- Armless rail shrouds (C4PRSN) attach to the rail between rail-mounted components where a center arm is not desired. The shroud is not required, but recommended to cover the rails visible between components to provide a cleanable surface between components. Specify finish to match rail.

Specification Steps for Comprise Modular

Plan the layout:

- Determine length of run(s) required. Comprise rails are based on 11" increments, with lengths starting at 22" up to 66"; supporting 1, 2 and 3 seat positions. 32" and 54" rail lengths support a combination of one or two seats or benches with 10" tables.

Specify Legs and Rails:

- Beginning a run with an **end leg**: legs and arms are non-handed; specification can begin from either end of run. Specify the end leg (with or without arm).
- Beginning a run with a **connecting end table**: end tables are non-handed; planning can begin from either end of a run. Specify the end table, then specify a center connecting leg (with or without arm).
- Specify a rail of desired length. Select the appropriate length of rail needed for seating, benching or tabletop sections. Specify rail finish to match leg finish.

Connecting Rail Sections:

- **Required**: a center connecting leg with or without arm must be specified to connect one rail to another. Connecting legs and arms are non-handed. Specify finish to match rails and legs.

Spanning Rail Sections with Connecting Tables:

- Center connecting tables include rails. Support the end of rail by first specifying a center connecting leg. Next, specify either a 10" or 22" center connecting table. Then specify a center connecting leg before continuing the run with additional rails.

Corner Connecting Tables:

- 90- and 120-degree center connecting tables include rails. Support the end of the rail by first specifying a center connecting leg. Next, specify either a 90 or 120 degree center connecting table. Then specify a center connecting leg before continuing the run with additional rails.

Modular Bariatric Seats and Bariatric Benches:

- Bariatric seats and benches include rails and may be positioned at end-of-runs or mid-run. Bariatric modular units must be used in combination with their supplied, unique rails and require legs on either end (end legs or center connecting legs).

Ending the Modular Run:

- To end a run, specify an end leg (with or without arms) at the end of the last rail.
- To end a run with a connecting end table, first specify a center connecting leg (with or without arms) at the end of the last rail, then specify the connecting end table.

Rail-Mounted Components

- Single seats, single benches, 22" table tops and center arms are available to specify on top of rails. Each module can be placed along the rails at 22" increments. Center arms mount between rail-mounted components. Center arms cannot mount at ends of rails.
- 10" table tops mount on ends of 32" rails or centered on 54" rails.

Final Details:

- Wallsaver foot is optional on all modular leg assemblies and recommended when seating is configured against a wall.
- Armless rail shroud, ordered separately (C4PRSN) is recommended to cover rails visible between seats, benches and tables wherever rail-mounted center arms are not used.
- Undermount and clamp mount power units may be specified for use on tables. Connecting tables, rail-mount tables and end tables include pre-drilled holes for undermount power.

DREME™ FLIP SLEEPER

DREME FLIP SLEEPER

Closed, lounge position with caster legs, full height arms and right arm tablet

Open, sleeper position with caster legs, full height arms and right arm tablet

GC65NN 65" armless sleeper

two textile application

For sleepers with smaller footprints and optional storage, see Dreme Pull-Out Sleeper on page 98

STANDARD FEATURES

- A simple, mechanism-free two-step design lets the back cushion flip over to create a comfortable sleep surface, without changing the sofa's footprint. Engineered for demanding healthcare environments, it exceeds rigorous testing standards and features replaceable high-use components for extended durability. Easy-to-clean high clearance legs, durable armcaps, and open clean-outs promote effortless maintenance and infection control.
- Designed with flexibility in mind, arm and armless models in four standard sizes can be customized in one-inch increments to fit any space.
- Four common sleep surface lengths: 66", 69", 72" and 75"; sleep surface width: 28.5".
- Standard with elevated, 8" metal legs with adjustable glides. Angled, wallsaver back legs provide ample space and visibility for daily cleaning. Legs with manual locking casters are available. Select two front manual locking casters with two non-locking, swivel casters or all four manual locking casters. Back legs with casters are straight, not wallsafe.
- Arm models have either full height arms (models with FF suffix) or partial height arms (models with HH suffix). Partial height arms match the sleep surface height to extend the sleep area.
- Arms are standard fully upholstered with no armcaps (**NC**). Urethane (**SSU**) and solid surface (**CO**) armcaps are available, see upcharges. Armcaps are securely fastened with metal-to-metal connectors and are field replaceable.
- Armless models have no end panels.
- Soft seat and back cushions are high density, ultra cell foam. Soft foam surfaces will develop comfort wrinkles in applied textiles. This is considered an aesthetic characteristic. To minimize the appearance of comfort wrinkles, a firmer foam should be requested through Global Specials.
- The back cushion is field replaceable and features a removable upholstery cover with waterproof zipper, secured to the seat frame. The cushion rotates forward and flips open to expose a vinyl upholstered sleep surface. Specify sleep surface color separately.
- The seat cushion has a seamless front edge and is field replaceable.
- Tablet arms are optional on models with full height arms in all standard high pressure laminate colors (**HPL**) or Charcoal phenolic (**PHN**). Specify right (**RT**), left (**LT**) or both sides (**TB**) of the chair, see upcharges. Each tablet requires 5.5" clearance to function and store. The tablet pivots for use and stores by lifting gently and rotating down to the side of the chair. Designed to support 55 lbs. evenly distributed.
- All models can be specified with integrated, single AC/USB-A and -C combo power in specified locations. Units are available in (**J**) Black or (**W**) White, with matching 120" three-prong power cord. Electrical units are factory installed.
- Models may be specified with contrasting fabrics. Specify seat and back cushions separate from outer back, arms and front rail. For pricing, start with the base price and add grade upcharges for both selections. *Note: the blended textile matrix does not apply to this series when specified as noted above.*
- For healthcare textiles, visit the website at globalfurnituregroup.com/healthcare.
- Dreme Flip is covered under Global Healthcare 12 year, 24/7 warranty. Carded textiles with a minimum 100,000 DR textile, maintained using the textile's recommended chemicals and procedures are covered. See warranty details.
- Warranted to support up to 500 lbs. active weight capacity per seat and 750 lbs. on sleeping surface distributed weight capacity.
- Ships fully assembled.

INFECTION CONTROL AND BED BUG RESISTANCE OPTIONS

Several optional features are available for improved cleanability, to control moisture, and to reduce the risk of bed bugs:

- The sleep surface (on the inside of the back cushion) is upholstered in moisture resistant vinyl, available in 9 colors. The sleep surface is 9:1 (water to bleach) cleanable.
- For woven textiles without a moisture resistant coating or backing, a moisture barrier may be selected on the seat (**MB**) or seat and back (**M1**) to minimize moisture penetrating to the seat cushion, see model upcharges. Moisture barrier is not recommended with water resistant textiles and may not be used in conjunction with sealed seams.
- Sealed seams are available on approved coated textiles (vinyl, silicone, etc.). Specify (**SE**) for sealed seams on seat and back cushions and (**S2**) for sealed seams on outer back, front rail and arms; see model upcharges. Note: minor puckering is common with the addition of sealed seams due to material buildup at corners.
- The frame underside is standard with a woven textile liner.
- A coated textile liner (**CL**) creates a moisture resistant liner; see model upcharges. For added protection and bed bug resistance, a sealed underside (**SU**) offers the greatest protection with a moisture resistant liner and a sealed staple strip; see model upcharges.
- Tamperproof fasteners (**TP**) are available for a higher level of safety; see upcharge. Not recommended for unsupervised behavioral health spaces.

STANDARD FEATURES

- Nourish is an innovative, state-of-the-art patient chair, developed in consultation with leading healthcare professionals. It embraces the body, cultivating comfort during periods of recovery.
- All chair models have left and right, easy to operate transfer arms. Transfer arms allow users to easily transfer in and out of the chair and provide easy access to assist the user.
- Models with fixed legs have a standard seat height of 18.5".
- Models with adjustable legs have adjustment pins to conveniently adapt seat heights from 17" to 20". 20" seat height models (-20) have a seat height adjustment range of 20" to 23". Front and back legs can be adjusted separately allowing modification of seat pitch, forward or rearward.
- Models with rear casters allow for 'tip and move' so the chair can be conveniently relocated while unoccupied. Optional Back Push Bar (**PBR**) and Rear Foot Rail (**RFR**) are each available to aid staff in relocating the chair (not for patient transport), see upcharges. Back Push Bar and Rear Foot Rail match frame finish. Note, Rear Foot Rail is not available on model GC3698 (4 manual locking caster model).
- Select models have a unique Schukra depth adjustable headrest solution integrated inside the back near the user's neck area. The depth is controlled by a handle on the lower outer back cushion.
- Schukra depth adjustable lumbar support for additional comfort is standard on select models.
- Standard models have minimal flex to the back. Flex back models (F model suffix) have additional back movement.
- Seats have a seamless, waterfall front edge, with highly durable, molded high density foam and a coated liner (**CL**) underside. For added protection, specify (**SU**) sealed underside to include a sealed staple strip.
- Metal frame is available in several paint finishes.
- The arm structure finish is Tungsten with a urethane armcap, available in six finishes.
- Sealed seams may be specified with approved coated textiles (vinyl, silicone, polyurethane) to mitigate liquid penetration at seams. Specify (**SWZ**) for sealed back seams with waterproof zipper and (**SE**) for sealed seat seams. Upcharges apply. Note: minor puckering is common with the addition of sealed seams due to material buildup at corners.
- A moisture barrier is available on seats and ottoman cushion to create an impervious barrier between the upholstery cover and cushion, specify (**MB**). See upcharges. Moisture barrier is not recommended with coated textiles (vinyl, silicone, polyurethane, etc.) and **may not be specified** when sealed seat seams are selected.
- Available to specify with two textiles, one for the seat cushion and one for the back (see model image). For pricing, start with the base price and add both back graded textile upcharge and seat graded textile upcharge.
- The Blended Textile matrix does not apply to this series.
- Nourish is covered under Global's 12-yr, 24/7 warranty. Textiles with a minimum of 100,000 double rubs must be specified.
- For healthcare textile and finish options, visit the website at globalfurnituregroup.com.
- Can be upholstered in standard Global textiles if high traffic, heavy duty or multi-shift compliance is not required. Global's limited lifetime warranty applies.
- Shipped fully assembled.
- Active weight capacity for standard single seat is 350 lbs. and 750 lbs for bariatric seating.

PRIMACARE™ SLEEPERS

PRIMACARE SLEEPERS

model GC3610SW

model GC3610SW pulled out

Two Textile Application

STANDARD FEATURES

- Primacare sleepers are ideal for space-constrained lounges and patient rooms providing sleeping space for one to two people. With zero wall clearance required, the sleeper is easy for one person to open and close. It is part of the Primacare healthcare collection for coordination of design across environments.
- Single unit sleep surface available in 24.5"W x 77"L (GC3610SW) and 30"W x 77"L (GC3610XW). Double unit (GC3610D) has two independently operated 24.5"W x 77"L sleep surfaces, each with standard underseat storage.
- Sleeper extends by pulling castered storage forward.
- Models are standard with four Black locking 3" dual wheel hard surface casters (C83R) to support the arm frame, and with non-locking casters to support the pull-out storage compartment.
- Tapered wood legs (**WOD**) are optional; available in all Global wood finishes, see upcharge. Non-locking casters remain on the pull out.
- Models are standard with Urethane, easy grip forward extending armcaps.
- Wood (**WOD**) and solid surface (**CO**) armcaps are available, see upcharges.
- Armcaps are securely fastened with metal-to-metal connectors and are field replaceable.
- Seat and back offer a 3.5" thick dual density ultra cell foam cushion for enhanced long term comfort.
- Seat cushion has a seamless waterfall front edge.
- Two concealed fabric pull tabs are located at the top of the back cushions. These allow the extended sleeping platform to be easily returned to a seated position.
- A Black, phenolic tablet arm with spill collector groove is available. Specify right (**RT**), left (**LT**) or both sides (**TB**) of the chair. See upcharges. Each tablet adds 4" to the width of the chair. Tablet requires 5.5" of clearance to operate. The tablet pivots for use and stores by lifting gently and rotating down to the side of the chair.
- Models may be specified with contrasting fabrics. Specify seat and back cushions separate from arms and front foot rail. For pricing, start with the base price and add both back/seat graded textile upcharge and the arms/front rail graded textile upcharge. *Note: the blended textile matrix is not applicable to this series when specified as noted above.*
- Carded healthcare textiles with a minimum of 100,000 double rubs must be specified to meet Global's 24/7 warranty coverage. For healthcare textiles, visit the website at globalfurnituregroup.com.
- When specified with approved, non-healthcare Global carded textiles, Global's limited lifetime warranty for 8hr, 5 days/week use applies.
- Warranted to support up to 350 lbs. active weight capacity per seat.
- Shipped fully assembled.

INFECTION CONTROL AND BED BUG RESISTANCE OPTIONS

- Several optional features are available for improved cleanability, to control moisture, and to reduce the risk of bed bugs.
- For woven textiles without a moisture resistant coating or backing, a moisture barrier (**MB**) is available to minimize moisture penetrating to the seat cushion. Moisture barrier is not recommended with water resistant textiles and may not be used in conjunction with sealed seams.
- For approved coated textiles (i.e. vinyl, silicone), sealed seams are available. Specify (**SWZ**) for sealed seams and waterproof zipper to prevent moisture or insects from penetrating seat and back cushion, see upcharges. For sealed seams on arms specify (**S3**), see models for upcharges.
- Note: minor puckering is common with the addition of sealed seams due to material buildup at corners.
- Underside of seat is standard with a coated lining (**CL**). For added protection and bed bug resistance, a sealed staple strip on the underside of the arms is available. Specify sealed lining (**SU**), see upcharge.

Dealer/purchaser is responsible for providing correct information when placing an order. Orders with incorrect information (finish, etc.) will be scheduled for manufacturing upon receipt of complete information.

All phone orders must be confirmed in writing by the customer within 7 days.

To prevent a delay in processing orders, please specify delivery routing.

Changes and Cancellations
After the date of Global's acknowledgment of a dealer/purchaser's order, the order may not be changed or cancelled by dealer/purchaser without the written consent of Global. Special order items, C.O.M. and fabric-covered items already in production are not subject to change or cancellation under any circumstances. Fabric-covered items are considered to be in production once the fabric is scheduled for cutting. Other standard items already in production are subject to a minimum 35% cancellation charge.

Errors and Omissions
All quotations, acknowledgements and invoices are subject to corrections for any errors and omissions.

FINISHES
Seating Finishes - Painted
Where painted frames are not a standard color, there is a one time charge of $613 list price per order for custom wood staining/color matching. Restrictions may apply. The customer must provide a 3"x 3" color chip/sample for review and approval. Non-standard finishes must be approved by Global prior to acceptance of order.

Seating Finishes - Wood Stained
Because the distinctive characteristics and the nature of wood products cause variations, exact matches are not always possible.
Global coordinates its finishes program between marketing divisions within the Global Group to match products as best as possible when same finishes are specified. However, Global will not be held responsible if the finishes cannot be matched.

Customers Own Material (COM)
Use of COM must be approved by Global prior to acceptance of order. Please submit the Authorization Request Form. Photocopy and use this form as often as necessary. The customer must provide a 12" x 12" fabric sample and advise how the fabric is to be applied and quantity of fabric being sent. **Textile yardage requirement will be advised by factory, and additional yardage may be required if pattern requires matching**. Upon approval from Global, send textile to your Customer Care Representative. If COM is difficult to apply or if product is required to be modified, extra charges will apply. Global reserves the right to cancel an order at any time if COM is inadequate for any reason. COM must be shipped freight and duties paid (if applicable) to our factory. Such shipment must be fully identified with the Purchaser's order number, RGA # provided by Global, and the item for which material is intended. Performance of COM when applied to product is the sole responsibility of the Purchaser. Global's standard product warranty shall not apply to COM. Use of COM will not reduce the published list price.

C.S.M. (Customer Specified Material)
Use of Customer Specified Material must be approved by Global prior to acceptance of order. If C.S.M. is difficult to apply or if product is required to be modified, extra charges shall apply. Global reserves the right to cancel an order at any time if C.S.M. is inadequate for any reason. Performance of C.S.M. when applied to product is the sole responsibility of the Purchaser. Globla's standard product warranty shall not apply to C.S.M.

VINYL AND FABRIC GRADING
All products are priced according to their standard vinyl and fabric grade. Lower grade vinyls and fabrics are available (unless otherwise specified) at same price as standard.

The listing of prices for each model indicates the price for each of the upholstery grades. Prices are based on yardage in imperial measurements. Please refer to the Textiles & Finishes section of the Global website for the most up to date listing.

UPHOLSTERY COVERINGS
Slight variations in color may occur between dye lots. Although Global attempts to minimize these variances, they do occur and must be accepted as normal and will not be considered defects.

YARDAGE
Required yardage (ydg) is based on unmatched materials with widths of 54" for seating. Yardage calculations are based on imperial measurements.

WEIGHT
This figure indicates the weight of one part and its packaging, regardless of the number of parts shipped in a single carton. In order to estimate the approximate shipping weight for an order, you have to multiply the indicated weight by the number of parts per carton. (e.g. if a part weight is 10 lbs. and is shipped 4 per carton, shipment weight should be calculated as: 4 x 10 = 40 lbs.)

CUBIC MEASURE
The stated cubage is an approximate cubic foot measure to calculate freight costs. The figure shown is the volume for the total shipment of a part (e.g. if a part is sent in 2 cartons the volume indicated reflects the cubage of both cartons together) and is subject to change without notice. It is most economical to purchase the specified number per carton.

Delays
Global's shipping confirmation will state a shipping date which is Global's best estimate at the time the order is acknowledged. However, Global shall not incur any obligation or liability to Purchaser for failure to ship by specified date unless Global has agreed to an unequivocal shipping date in a separately signed written document executed by its authorized personnel at its head office. In addition, Global shall not be liable for any loss or damage resulting from any delay or failure in shipment or other failure to perform all or any part of the agreement between the parties with respect to the goods shown on the face of the order acknowledgement where such delay, failure, loss or damage is the proximate result of any act of any governmental authority or political subdivision thereof, revolution, riot, civil disorder or disturbance, delay or default in transportation, strike disputes among or between labor unions or other labor disputes, delay or inability in obtaining materials and facilities, fire, flood, act of God or any cause not within the reasonable control of the company, whether of the class of causes enumerated or otherwise.

F.O.B.
F.O.B. point is Global's Factory, Downsview, Ontario, Canada, or any Global Regional Distribution Center.

FedEx and UPS Shipments
Seating products marked with a FedEx or UPS symbol are packaged for shipment via FedEx or UPS.

Handling
Non-UPS/FedEx orders under $10,000 list incur $100 net handling fee. Small packages (FedEx, UPS) incur $25 net handling fee per carton (up to four cartons).

Special Delivery Requirements
Global's delivered pricing provides for dock delivery during normal business hours (considered to be 8 am to 4 pm Monday through Friday) to customer/end user only. Additional delivery requirements such as inside delivery, lift gate, limited access sites, installations and weekend deliveries will incur an additional expense and will be the responsibility of the dealer.

Service
Service requests are normally the responsibility of Global's authorized dealers. Where this cannot be accomplished on a local level, service problems should be referred to Global's Customer Service Department in the nearest distribution center.

Returns
No returns of goods will be accepted without written consent and shipping instruction of Global. A minimum re-stocking charge of 35% is made on all authorized returns for credit or refund, provided goods are received by Global in the condition in which they left the factory. This may increase depending on the type of product. Global's Return Goods Authorization (R.G.A.) numbers must appear prominently on all authorized returns. Global will not be responsible for freight costs. No credit will be given if goods cannot be reused as new. Special order items, non-stock items and C.O.M. products are in no event subject to return. All returns must be approved and authorized in writing by Global Customer Service. Global reserves the right to refuse delivery of any unauthorized returns.

Claims
All goods are sold F.O.B. plant or Global Distribution Center. Global is not responsible for damage which occurs in transit (or in storage). The carrier signs for all goods received in apparently good order. It is the dealer/purchaser's responsibility to examine goods upon receipt and to file any claims with the carrier for losses or damage to the product occurring during transit, including concealed damage.

Any claims made against Global for apparent defects, errors or shortages must be made by the dealer/purchaser, in writing, within 15 working days after any delivery. Failure by the dealer/purchaser to make any claim against Global within 15 days shall constitute acceptance of the goods and a waiver of any apparent defects, errors or shortages.

Suspension
In the event that the dealer/purchaser defaults in the payment of any sum due to Global, or in the event the dealer/purchaser's financial condition becomes unsatisfactory to Global, Global shall have the right to defer or discontinue shipment of any goods until such time as the default is cured or the dealer/purchaser provides assurance of payment to Global.

If a conflict arises between: (i) prices found in software support packages furnished to the customer by Global or by any other source on behalf of Global; and (ii) Global's current printed price lists, then the most current shall prevail.

Many Global products pass or exceed the most stringent testing procedures. Where tests are significant, they are marked as C.G.S.B. (Canadian General Standards Board) qualified and as passing ANSI/BIFMA (American National Standards Institute/Business Institutional Furniture Manufacturer's Association).

Flammability
The foam used in Global chairs meets the requirements of California TB117. In addition to the foam, upholstery materials must also meet the California TB117 smolder resistant requirements. Please contact Customer Care to determine if a selected textile meets the California TB117 requirement.
