

STACKING OVER PANELS

Compile now offers stacking Over Panels to easily increase the height of Compile panels 12”, 16” or 24” in additional height. Four simple attachment plates secure the Over Panels to the Compile Panels without extensive installation time required.

KEY FEATURES

- Modules stack on top of Compile Panels
- Choose from fabric, laminate, write board and glazed
- Heights available in 12” 16” and 24”
- One high stacking only
- Stacking Over Panels are not load bearing
- Two attachment brackets per side are included
- Universal Stacking Corner Posts can be specified in 2-way, 3-way and 4-way configurations
- End of Run Trims can be added to Over Panels only, or specified as full-height trims
- Maximum height available is 90” high, when stacking a 24” Over Panel onto a 66”h Panel
